

# Attention Administrators And Decision Makers!!!

## *Plastic Bags Cost Too Much!*

*Purchase the IP-Pouch  
from these Distributors:*

**MCKESSON**

*Empowering Healthcare*

**1. PLASTIC BAGS Need to be Replaced Each Week:** Plastic Bags, plus the time to put them up each week cost over \$5 per month. The IP-Pouch is replaced **once per month** with an MSRP of only \$1.99. *(Volume Discounts available)*

**Q. What is your employee's time worth?**

**2. PLASTIC BAGS Allow Microbes to Survive and Thrive:** MRSA & VRE survived longer on Plastic (**Over 90 Days**) than on any material tested that is common in healthcare facilities. *-Journal of Clinical Microbiology.*

In University studies, Plastic Bags increased Staph microbes 28% in 1 hour on a Nasal Cannula.

**Q. Does the spread of MRSA & VRE concern you?**

**3. PLASTIC BAGS Increase Respiratory Infections:** In field trials, Plastic Bags increased respiratory infection while the IP-Pouch reduced respiratory infections over 60% compared to the use of Plastic Bags.

**Q. How much do infections cost your facility?**

**4. PLASTIC BAGS Increase Mortality:** In Nursing Homes, respiratory infections caused by influenza, parainfluenza, and respiratory syncytial viruses are often fatal. Nursing homes, which generally have older and frailer residents, can experience attack rates up to 60% and case fatality rates as high as 55%. *-Infectious Disease Clinics of North America 2007*

**Q. What is your respiratory infection mortality rate?**
